

Emerging technologies
no longer represent
our future; they are our
present.

Be the change.

We offer a 360'
approach to talent
development and
business innovation.

OUR VISION

To create equal opportunity access to emerging technologies for everyone in Africa.

OUR APPROACH

To bridge the gap between possibility and reality, we develop both the talent and create the market by supporting startups and corporates to innovate solutions and grow along the emerging technology axis, making it possible for everyone, everywhere to benefit from the opportunities the future holds starting in the now.

OUR KEY PILLARS

BUSINESS TRANSFORMATION

We are living in exciting times. Technological Innovations are changing the way how we live, love and do business. Let us not waste this chance. Let's lead the way and leapfrog.

STAFFING

Up-skilling the knowledge in your organisation is in good hands with us. Expand your team with qualified employees shaping your technological transformation.

EDUCATION

To fast-track the up-skilling of talent, we have partnered with renowned universities from Germany, UK and US to offer their degree programs (BSc | MSc in Data Science and in Artificial Intelligence) in (East) Africa.

OUR AREAS OF EXPERTISE:

Data Analytics | Machine Learning
Artificial Intelligence
Blockchain | IoT | Robotics
Virtual & Augmented Reality

The world is shaping
the 4th Industrial
Revolution.

Join the world.

What we do

Gap Analysis

Digital transformation can seem a daunting task when you don't know where to begin. Most likely though you are more ready than you think – we help you assess your business and identify the gaps between the now and future.

Innovation Sprints

Sometimes it is a question of just unlocking the potential. Innovation Sprints are short term projects supporting you with knowledge, frameworks & project management to kickstart your digital journey.

Business Transformation

Transformational change is a long term process – we know! We tailor make programs to be your business partner supporting you with knowledge, frameworks and project management.

Corporate Pipeline Program

Recruiting talent can turn out to become a hit and miss, especially in emerging technology. With our 3 month Corporate Pipeline Program we take that headache away from you in bridging the knowledge gap when onboarding.

Don't let a lack of knowledge and expertise stand in the way of your future.

Outsource Your Growth

Up-skilling the knowledge in your organisation is in good hands with us. We are your business partner to shape your technological transformation.

Pioneer Projects

Our pioneer projects are designed for businesses to pilot and experiment technological innovation at low cost: a team of three students supported by our faculty and network will develop a working solution or prototype for a your-defined problem.

High Skill Staffing

No need to spend your limited budget on a full blown high-tech in-house organisation. Simply let us know what you need and we build your capacity & capabilities for you, leveraging our knowledge and expertise to deliver your results.
